APPLICATION FOR WATER AND SEWER SERVICE

Approval of applications will be granted upon full compliance with MUA policies. Non-compliance will result in revocation and/or a stop in services until requirements are met. Listed below are MUA requirements for service per MUA policy and will be reviewed by the Operations Manager and his/her designated representatives before approval is granted. Upon approval of connection the customer agrees to MUA terms of service, which state that the service connection under MUA maintenance ends at the property line or water meter (to be installed by MUA). MUA will not be responsible for the operation and maintenance of the permittees section of the service connection (from meter to residence). Sewer service connections under MUA maintenance and operation begin at the sewer main angled connection and do not extend to the residence or structure.

The following procedures are required of all MUA customers and/or private contractors before water and sewer service activation.

1. The customer shall provide proof of ownership or housing/lot permit, (assigned by Housing and Lot Committee), and archeological clearance (where applicable).
2. The customer and or contractor will be responsible for obtaining Right-of-Way easement where applicable.
3. For NEW construction the customer shall provide a copy of proposed construction plans and/or As-Built Drawings - A & E blueprints to be reviewed by the Operations Manager and his/her designated representatives.
4. If construction is to be done by a contractor other than MUA, the customer will provide location and depth of services, pressure readings, and any other pertinent information ensuring proper connections.
5. MUA will monitor and inspect any operation and maintenance of service connections to ensure no cross connections exist.
6. MUA will perform the final inspection of the water and sewer connections prior to activation or service.
